

- Hydraram HFP22RV, Rotating Pulverizers for 15 to 30 ton machines.
- We can change the head bracket to suit your machine.
- The Hydraram HFP RV-Pulverizer is specially designed for the secondary demolition of buildings and recycling.
- The shape of the jaws of the crusher is designed to pick up and crush concrete as effectively as possible.
- The steel cutters in the back of the pulverizer's jaw can cut the existing reinforcement steel easily.
- Made from the most durable steel which HARD0X-400® with an extremely high wear resistance, resulting in minimum maintenance and a long lifespan.
- Equipped with a rapid flow valve for extremely rapid work cycles.
- Rotating head for easier use.
