

- Hydraram HSS22RV, Scrap/Steel Shear 15 to 30 ton machines.
- We will change the head bracket to suit your machine
- Hydaram HSS Scrap & Iron cutters; Designed and used for demolishing steel structures and cutting scrap.
- Special and unique design used to cut steel. The jaw has the shape of the beak of a parrot.
- The materials you want to cut stay in the jaw while being pulled in, ensuring a fast and effective performance.
- The shears are made out of a wear-resistant steel mix; this guarantees you less maintenance and a long life cycle.
- The HSS-scrap shear is designed for the demolition of heavy steel structures and the processing of scrap.
